

Ergonomic workstation mat

Sunnex IND

Mat design

Sunnex IND is an ergonomic workstation mat which is made of a special nitrile rubber compound. The mat is designed to reduce stress on the back, hips, legs and feet. It is the elasticity of the nitrile rubber in combination with the air-cushion principle and bumps on the upper part of the mat which provides comfortable and ergonomic pressure relief.

Cross-section profile of Sunnex IND

Properties

Sunnex IND possesses the elasticity required to achieve maximum working comfort. The mat has extremely good resistance to wear and is also resistant against commonly occurring oils, chemicals, cutting fluids, emulsions, and cleaning agents which makes the mat perfect for demanding environments in, for example, the engineering industry.

The high friction which the nitrile rubber has against other materials helps the mat to lie still on the floor

and the sloping outer edge makes it easy to drive over with, for example, a pallet loader.

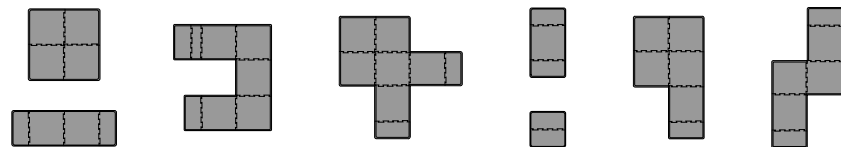

Flexibility

The flexible and unique construction system means that Sunnex IND can be assembled to your desired layout. No

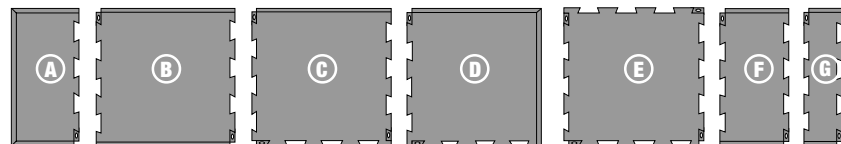

tools are needed and each section is fastened together using the profile of the mat and the Sunnex SUR-LOK™ click system.

Sunnex IND comes in grey and the mat can easily be cut using a sharp pair of scissors to fit, for example, around a table leg.

Layout examples

Mat sections

Mat sections	Dimension approx. value, mm	Weight approx. kg	Art. nr.
A+B+A Basic kit	750 x 1500	10,0	100000
A End section	750 x 375	2,4	100001
B Middle section	750 x 750	5,2	100002
C Edge section	750 x 750	5,2	100003
D Corner section	750 x 750	5,2	100004
E Central section	750 x 750	5,2	100005
F Combination section 1	750 x 375	2,4	100006
G Combination section 2	750 x 175	1,3	100007
